This is a public records request for attachments referenced in 4/13/25 email to you from "Boundary county watchman":

Ironically this email is acknowledgment of the sender inciting harmful dangerous behavior of third parties, all the while sender was certain to "doxx" my children's identities and home, as it was directly indexed and tagged with the inflammatory viral content that perpetrated the senders alleged "concern". This makes my blood boil and further substantiates the senders intent scope of harm to my children and family that remains. Uninvestigated criminal Intent at the cost of my children and family's safety and peace (we have none).

Please provide responsive records via email delivery.

I am an Idaho resident.
